Improving Pakistan Education system:

The first thing that is needed to improve the education system in Pakistan is to improve the quality of teachers. This can be done by providing better training to the teacher and a teacher should be selected on proper merits.

All the institutes should have same syllabus and paper should be carried out under one education board which should be properly monitor by the government of Pakistan.

The Islamic education system should be followed by all the educational institutes.

The concept of private schools should be declined because this is becoming a business only for earning, not for giving education.

All the schools in Pakistan needs renewsation to give the quality education according to international standards.

Last but not the least books and syllabus should be immediately change according to latest studies.

Revitalizing Pakistan economy:

Economy plays a very vital role in developing a country. Pakistan economic is the one of worst economic system in the world

The first and most important reason behind worst economy is that we are doing all over business on interest (Which is direct battle with Allah, and no one has power to defeat Allah). Firstly government should immediately stop interest business.

Government of Pakistan should build factories and industries instead of giving them so that people can get work and contribute for the betterment of economy.

Interest free loan should be given to young and talented people, so they can start their work and develop Pakistan economy

Overall Pakistani economy can be revitalized only by running economy according to Islamic rules and regulations.

Reforming Pakistan legal system:

Laws are made to give justice to peoples and protect there life at every cost, but unfortunately all the laws are there in Pakistan constitution, but the problems arises because of no implemtaion of laws.

Following are some ways to reform Pakistan legal system:

- All the laws in Pakistan should be made and implemented according to Islamic teachings.
- Law should be equal for every Pakistani (without giving benifits to rich and powerful people and punishments to only poor and weakend peoples)
- There should be a time duration for solving a lawsuit.
- The accused of rape and other swear crime should be hanged in front of public.
- Our judicery must be independent and work without any fear accept Allah.
- Protocols of judges and lawyers should break-off as soon as possible.

Leveraging digital IT service:

Leveraging digital technology seeks out ways to employ technology to optimize organizational and individual performance. Unfortunately Pakistan is very behind in the race of information technology. As the world is changing so fastly, all over daily life works and businesses are shifting online. So we have to do extra efforts in digital IT service to make Pakistan a good IT hub.

Following are some ways which can help in leveraging digital IT service:

- School and college students should be taught about information technology on daily basis and it should become compulsory subject for all student.
- Young generation should be given IT trainings.
- More IT university should be developed, and there should be proper check and balance on the system.
- Free IT courses should be provided to needy students, so that they can also contribute in developing digital Pakistan.

Dr Afia Sadiqui and Palestine:symbol of resistance:

Dr Afia Sadiqui, a brave Muslim lady born on March 2, 1972 in Karachi. She was born to a Sunni family. She is serving 82 years jail for attempt murder and other felonies. These blams are totally fake and these lawsuit has no relation with reality. She was sentenced to jail just because she is a brave Muslim scientist and follows Islam from his soul. She is a proud for every single Pakistani and other Muslims around the world.

We are so busy in following western and earning dollars that we forgot our Islamic values. She is there in American jail just because of us. This is the place of pudency for us that we are even can't able to release our sister from so called Americans.

Palestine, a matter of life and death for every Muslim. Masjid Al Aqsa, our first qibla and land of prophets(pbuh) is in trouble. The Israeli terrorists attacked on innocent Palestine Muslims and start killing them like animals but the surprising thing is that no Muslim country fought for Palestine and even not stand with Palestine.

We pray from Allah to help our Muslim fellows and defend them from terrorist Israel.

The mission of a Muslim:

The first and most important mission of a Muslim is to work for the sake and empowerment of Islam. To defend the dignity of our holy prophet(pbuh) should be our first priority. Without Holy prophet(pbuh) we are nothing and can never succeed in our life. A Muslim should work for islami nizam in the world.

A Muslim should always be ready for sacrificing his life for Allah, for honor of holy prophet, for dignity of Holy Quran and when ever there is need for Islam. A Muslim should spend his life according to teaching of Islam and holy prophet(pbuh)

A Muslim should do jihad whenever Islam is in trouble and whenever our Muslim brothers are victim of oppression. A Muslim should always follow Islamic not culture and strictly avoid western thoughts and culture.

Effective programs like sdl:

SDL(Skillful and Detriment Leadership) course is a great initiative of KHREWS. It is a great work done by THAREK E LABAIK PAKISTAN(an Islamic political party working for islami nizam in Pakistan)

I learn a lot from this course, it is not only a course but a life changing opportunity for many young people who wants to work for Islam and Impowerment of Muslims in the world.

This course realizes us our responsibilitis,which we should have to full fill being a Muslim. This course develops leadership qualities in me and gave me an Islamic mission. Accept all these benifts this course educated about medical field and most demanding IT skills requirad to be successful in this modern world. In future more this type of course should be launched for the bettyof youth and PAKISTAN.

At the I thanks to all the teachers, team and management of KHREWS. May Allah grant mercy of ALLAMA KHADIM HUSSAIN RIZVI (RA).He is a true role model for me, he changed my life and gives me the mission of implementing Islamic nizam in Pakistan.

Islam Zindabad
Pakistan Zindabad

Once again a special thanks to all the KHREWS management.
